Badore, Ajah, 106104, Lagos, NG. +2348106271474 – gabrieltaiye001@gmail.com

Summary

Dynamic and results-driven Web Developer with a solid background in PHP OOP, Laravel, WordPress, Web hosting and front-end technologies such as HTML5, Bootstrap, jQuery and JavaScript. Skilled in creating responsive and user-friendly web-based applications, providing robust IT support. Adept in data processing and agile methodologies, with a proven track record of delivering quality projects on time.

Experience

IT Support Specialist

Sept 2024 - Present

Westfield Energy Resources Limited – Lekki, Lagos, NG.

I provide technical assistance and support to individuals and organizations, ensuring the smooth operation of computer systems, hardware, and software. My expertise includes troubleshooting, resolving technical issues, and implementing preventative measures to minimize downtime.

Key Responsibilities:

- Provide technical support via phone, email, and in-person
- Troubleshoot and resolve hardware, software, and network issues
- Install, configure, and maintain computer systems, hardware, and software
- Conduct routine maintenance tasks, such as backups and updates
- Collaborate with other IT team members to resolve complex technical issues

Software Developer

August 2024 - October 2024

University of Benin Teaching Hospital (UBTH) - Benin, Edo, NG.

In my role as a Software Developer at the University of Benin Teaching Hospital, I was responsible for the development, deployment, and maintenance of various web solutions. Working closely with a team of developers and stakeholders, I have successfully designed and implemented two comprehensive school portals, providing seamless online services for students, faculty, and administrative staff. Additionally, I have developed multiple internal web solutions to streamline operations within the hospital, improving efficiency and user experience. My responsibilities also include maintaining the main website, ensuring it remains updated, secure, and user-friendly.

Part-Time Web Developer

May 2024 – July 2024

University of Benin - Benin, Edo, NG.

I collaborate with the ICT/CRPU department at the University of Benin as a part-time developer, where I contribute to the development of academic solutions. My work focuses on creating and maintaining software applications that manage student data across all stages of their academic journey, from admission processes to final year transcript generation.

Big Gorilla Apps - Software Developer (Remote)

January 2024 - May 2024

During my tenure at Big Gorilla Apps, a UK-based software development company, I worked remotely as a Software Developer. In this role, I collaborated with a team to create robust and scalable web solutions within a short time frame. My tasks included coding, testing, and implementing features, as well as troubleshooting and optimizing existing applications. This experience provided me with valuable insights into working across different time zones and adapting to various development practices.

Web Developer

June 2020 to November 2023

Viisionz Cyberspace Transmission Resource - Benin, Edo, NG.

My Key Responsibilities:

- Design, Develop, and Maintain Websites: Build responsive, user-friendly websites using PHP (Laravel),
 JavaScript, Bootstrap, and AJAX to ensure seamless functionality and an optimal user experience across all devices and browsers.
- Custom Web Application Development: Develop and maintain custom web applications with robust backend logic using Laravel, integrating front-end interfaces built with HTML, CSS, and JavaScript frameworks.
- CMS Integration and Customization: Customize, manage, and maintain WordPress and Shopify sites, including theme customization, plugin integration, and e-commerce functionalities, ensuring efficient and scalable solutions.
- Front-End Development: Create responsive and interactive front-end components using Bootstrap, JavaScript (including libraries like jQuery), and AJAX for real-time updates and dynamic content handling.
- Collaborate with Cross-Functional Teams: Work closely with designers, content creators, and marketing teams to implement design elements, ensuring visual consistency and functional integration across the platform.
- **API Integration:** Develop, integrate, and maintain APIs for seamless data exchange between front-end and back-end systems, ensuring efficient and secure data handling.
- Troubleshooting and Debugging: Identify and resolve technical issues across the web stack, ensuring website security, functionality, and performance.

Skills

- Web Development: PHP OOP, Laravel, WordPress, HTML5, CSS3, Bootstrap, JavaScript, jQuery, AJAX, JSON
- **CMS Platforms:** WordPress and Shopify Development and Maintenance
- Database Management: MySQL, Maria DB, Database Optimization, Data Migration
- Data Processing & Analysis: Office 365 Tools
- Software Development Methodologies: Agile Technology, Scrum, Version Control (Git)

- Leadership Essential for guiding teams and organizations.
- Thinking Critical thinking and problem-solving abilities.
- Research and Development Innovating and improving products or processes.
- Product Development Creating new products or improving existing ones.
- ICT Information and Communications Technology skills.
- **Cyber Security** Protecting systems and data from cyber threats.
